To whom it may concern

This letter is to acknowledge that SGH and Dr. Wassim Naguib have worked directly with Oregon DOT (ODOT) on a bridge retrofit and rehabilitation project.

SGH and Dr. Naguib did work with ODOT on the Mt. Scott bridge project in Oregon. SGH and Dr. Naguib showed understanding and good technical knowledge in design and repair of this bridge. The bridge system of the above mentioned project included haunched reinforced concrete deck girders (RCDG) with composite deck system. SGH and Dr. Naguib demonstrate excellent knowledge, especially, in application of innovative bridge repairs using the state-of-the-art Fiber Reinforced Polymers (FRP) in strengthening some girders on this bridge project.

I highly recommend SGH and Dr. Naguib in future DOT projects involving both bridge repair and new design.
