**Subject: Design of Sludge Canopy System-Secondary Clarifiers**

Dear Dr. Naguib,

I would like to personally thank you and your firm, WIN Structural Consulting Group, for outstanding services related to our Secondary Clarifier Optimization Project at Oro Loma Sanitary District. WIN performed well, integrating the fiberglass baffles of the Sludge Canopy and their support structure into the existing clarifier structure. The prepared drawings were clear and prepared in a timely manner.

I appreciated the level of care taken to analyze the operation of the equipment and to insure that your design did not restrict the operation in any way. Your design was flexible enough to accommodate field variances and was constructed for costs within the expected range. I also appreciated your coordination with the fabricator, quality assurance/testing lab, and the manufacturer to ensure that this custom fabrication met all of the required material properties.

I look forward to working with you and WIN Structural Consulting Group in the future. You are free to use my name and comments with any marketing efforts that you so desire in your work. I can be reached via 510-276-4700.

Very truly yours,

Jason Warner  
General Manager
