TO WHOM IT MAY CONCERN

This letter is to acknowledge the professional structural consulting services conducted by Dr. Wassim Naguib, S.E. working with Sutro Tower, Inc. in San Francisco. Dr. Naguib worked on multiple seismic/wind upgrade and structural design services to the project team.

Dr. Naguib of WIN STRUCTURAL CONSULTING GRP, Inc. has shown professionalism and extreme knowledge to structural engineering design principles and complex structural analyses working on the complex 977 foot free standing signature steel tower and its auxiliary structures that are on site.

In addition to that, Dr. Naguib has participated in the development of the contractual documents - including Autocad 3-D simulation drawings of the tower, the response to City of San Francisco comments and the construction administration process of the \$15 Million digital conversion project that included the seismic upgrade and complex wind analysis and wind tunnel evaluation.

Dr. Wassim Naguib, S.E. continues to assisting the Tower team on multiple projects and it is our pleasure to recommend him for other structural projects due to his capabilities, knowledge and professionalism.

Sincerely,

A handwritten signature in blue ink, appearing to read "Eric Dausman". The signature is fluid and cursive, with a large initial "E" and "D".

Eric Dausman,

VP & COO
